SOVIET MATHEMATICS—DOKLADY
Translation edited by Ben Silver with the assistance of Ralph Sizer

A translation of the mathematics section of
ДОКЛАДЫ АКАДЕМИИ НАУК СССР

Издательство "Наука", 1991 г.

Each issue corresponds to one volume of the Soviet *Doklady*, which is issued three times a month, six issues constituting a volume.

SUBSCRIPTION INFORMATION. *Soviet Mathematics—Doklady* is published six times per year. Subscription prices for Volumes 42–43 (1991) are \$602 list, \$482 institutional member, \$361 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$9; subscribers in India must pay a postage surcharge of \$17. Expedited delivery to destinations in North America \$17; elsewhere \$40. Combination paper and microfiche subscription prices are \$801 list, \$642 institutional member. Microfiche of each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

BACK NUMBER INFORMATION. For back issues see the *AMS Catalogue of Publications*.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.* Address changes and other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale.

Soviet Mathematics—Doklady is published six times per year by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second class postage paid at Providence, Rhode Island. Postmaster: Send address changes to Soviet Mathematics—Doklady, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

SOVIET MATHEMATICS — DOKLADY

Volume 43, Number 1

July-August 1991

CONTENTS

Asratyan, A. S. and Mirumyan, A. N. <i>Transformations of edge colorings of a bipartite multigraph, and their applications</i>	1
Boimatov, K. Kh. <i>Multidimensional spectral asymptotics for elliptic operators in domains satisfying the cone condition</i>	4
Brykalov, S. A. <i>Existence and nonuniqueness of solutions of some nonlinear boundary value problems</i>	9
Vavilov, S. A. <i>On the solvability of a class of operator equations</i>	13
Davtyan, A. A. <i>On the spaces $\mathring{W}_2^{\mathfrak{A}}$ and coercive properties of equations of elliptic type</i>	18
Elkin, V. I. <i>Automorphisms and decomposition of affine control systems</i>	23
Ershov, Yu. L. <i>Characterization of Kochen rings of PC_M-fields</i>	26
Zvyagin, M. Yu. <i>Second order equations reducible to $z_{xy} = 0$ by a Bäcklund transformation</i>	30
Sabitov, K. B. <i>On the spectrum of a gas dynamics problem of Frankl' for equations of mixed type</i>	35
Temlyakov, V. N. <i>On universal cubature formulas</i>	39
Shamaev, I. I. <i>Operators of diffusion type</i>	43
Gomilko, A. M. and Radzievskii, G. V. <i>Equiconvergence of series in eigenfunctions of ordinary functional-differential operators</i>	47
Gorbunov, K. Yu. <i>Context-free decidability of graphs that do not realize a plane lattice</i>	53
Guliev, V. S. <i>On the boundedness of singular integral operators on the Heisenberg group in weighted generalized Hölder spaces and weighted L_p-spaces</i>	58
Gurvich, V. A. and Khanin, K. M. <i>A Gaussian distribution for sums of distances</i>	63
Denisov, V. N. <i>Stabilization of solutions of parabolic equations, and the central limit theorem</i>	69
Kravchenko, V. G. and Shaev, A. K. <i>The theory of solvability of singular integral equations with a linear-fractional Carleman shift</i>	73
Maksudov, F. G., Allakhverdiev, B. P., and Bairamov, È. M. <i>On the spectral theory of a nonselfadjoint operator generated by an infinite Jacobi matrix</i>	78
Pogorelov, A. V. <i>On a theorem of Beltrami</i>	83
Roitberg, Ya. A. <i>The Cauchy problem for general hyperbolic systems in a complete scale of spaces of Sobolev type</i>	86

Starkov, A. V. <i>On majorant optimization of weighted algorithms in the Monte Carlo method</i>	92
Strugov, Yu. F. <i>On homeomorphism of Q_p-extremal mappings</i>	97
Yulmukhametov, R. S. <i>Homogeneous convolution equations</i>	101
Yunusov, M. Yu. <i>A two-sided power boundary layer in nonlocal problems</i>	104
Agadzhanyan, A. N. <i>Strictly nuclear imbeddings and interpolation of Sobolev spaces of infinite order</i>	108
Akhiev, S. S. and Sanieva, S. N. <i>On problems of Cauchy and Goursat type on composite lines</i>	112
Bronshtein, M. D. and Cherevatskii, A. S. <i>Variational problems for functionals determined by the maximum of a Lagrangian</i>	117
Gurvich, V. A. and Khanin, K. M. <i>A Poisson distribution for the number of pairs of close points</i>	122
Eremenko, A. È. and Sodin, M. L. <i>On the distribution of values of meromorphic functions of finite order</i>	128
Kazaryan, K. S. and Ul'yanov, P. L. <i>On a problem of Alexits with respect to divergence of orthogonal Fourier series</i>	132
Kolesov, A. Yu. <i>A new class of relaxation systems in general position</i>	137
Petrushko, I. M. <i>On the boundary values of solutions of second-order parabolic equations degenerate on the boundary of the domain</i>	141
Rakhmetov, N. K. <i>On the uniqueness of an element of best approximation in certain function spaces</i>	145
Abasov, M. T., Rasulov, M. A., Ibragimov, T. M., and Ragimova, T. A. <i>On a method of solving the Cauchy problem for a first-order nonlinear equation of hyperbolic type with a smooth initial condition</i>	150
Avdonin, S. A., Ivanov, S. A., and Ishmukhametov, A. Z. <i>A quadratic problem of optimal control of the vibrations of a string</i>	154
Aliev, I. A. and Gadzhiev, A. D. <i>Weighted estimates of singular integrals generated by a generalized shift operator</i>	159
Aseev, V. V. <i>On extremal mappings of dihedral wedges</i>	162
Akhtamova, S. S. and Belov, Yu. Ya. <i>On some inverse problems for parabolic equations</i>	166
Babin, A. V. <i>The asymptotic behavior as $x \rightarrow \infty$ of strongly perturbed Poiseuille flows</i>	171
Belov, Yu. Ya. and Savateev, E. G. <i>On an inverse problem for a parabolic equation with an unknown coefficient on the time derivative</i>	176
Danilov, L. I. <i>Estimates of the Poisson kernel for a tube domain over a pointed cone</i>	181
Kamynin, V. L. <i>Asymptotic behavior of solutions of the Cauchy problem for non-divergence parabolic equations</i>	184
Levitskii, B. E. <i>The reduced p-modulus and the inner p-harmonic radius</i>	189
Melikyan, A. A. <i>Optimal guaranteeing control of a dynamical system with search for a goal point</i>	193
Rodionov, E. D. <i>Compact periodic standard Einstein manifolds</i>	198

Samoilenko, A. M. and Ilolov, M. <i>On the theory of evolution equations with impulsive action</i>	202
Sobolevskii, E. P. and Sobolevskii, P. E. <i>The commutant method and coerciveness of the Cauchy problem</i>	205
Khisamutdinov, A. I. <i>Algorithms with "different time coordinates" in Monte Carlo methods for the nonlinear "smoothed" Boltzmann equation</i>	209
Amirov, R. Kh. <i>Integral geometry and the problem of determining a Riemannian metric</i>	214
Belov, Yu. Ya. <i>On an inverse problem for a semilinear parabolic equation</i>	216
Zarkh, M. A. <i>A value function criterion in a linear differential game</i>	221
Ivanov, A. A. <i>A geometric approach to the question of uniqueness for sporadic simple groups</i>	226
Katrakhov, V. V. <i>Singular boundary value problems for some elliptic equations in domains with corner points</i>	230
Salakhitdinov, M. S. and Islomov, B. <i>Boundary value problems for an equation of mixed type with two interior lines of degeneracy</i>	235
Sushchanskii, V. I. <i>Wreath products and general products of groups</i>	239
Tret'yak, A. I. <i>On necessary conditions for optimality of even order in the time-optimal problem for a class of control systems</i>	243
Trubin, V. A. <i>On the determination of the strength of a graph</i>	246
Belyankov, A. Ya. <i>Formal apparatus of the method of exhaustion in linear algebra</i>	250
Didenko, V. D. <i>Para-algebras and approximate solution of singular integrodifferential equations</i>	255
Zubov, V. I. <i>Interpolation and approximation of probability distributions</i>	260
Lyskova, A. S. <i>Orthogonal polynomials in several variables</i>	264
Moiseev, E. I. <i>On a problem of Lions</i>	269
Radkevich, E. V. <i>The Gibbs-Thompson correction and conditions for the existence of a classical solution of the modified Stefan problem</i>	274
Sarymsakov, T. A. and Ganikhodzhaev, N. N. <i>On the ergodic principle for quadratic processes</i>	279
Sedenko, V. I. <i>Uniqueness of the generalized solution of an initial-boundary value problem in the nonlinear theory of vibrations of shallow shells</i>	284
Strunkov, S. P. <i>Generalizations of Euler's divisibility theorem and other arithmetic properties of representations of finite permutation groups</i>	288
Sychev, M. A. <i>On the regularity of solutions of some variational problems</i>	292
Chistyakov, G. P. <i>On the convergence of n-fold convolutions of distribution laws with infinitely divisible distribution laws</i>	297
Table of Contents for the next issue (Vol. 43, No. 2, September-October 1991, Russian original Tom 317, nos. 1-6)	299-a

CONTENTS

Vakhrameev, S. A. <i>A theorem on the Morse index of the extremals of some optimal control problems</i>	301
Gabasov, R. and Kirillova, F. M. <i>Dual optimization for dynamical systems</i>	306
Dzhuraev, T. D. and Abdinazarov, S. <i>A nonclassical boundary value problem for a higher order equation with multiple characteristics</i>	311
Ivanov, V. K. and Mel'nikova, I. V. <i>New generalized functions and weak well-posedness of operator problems</i>	315
Il'in, V. A. <i>On equiconvergence with a trigonometric series of expansions in root functions of the Schrödinger operator with an arbitrary summable complex-valued potential</i>	320
Imanaliev, M. I. and Asanov, A. <i>On solutions of systems of nonlinear two-dimensional Volterra integral equations of the first kind</i>	325
Mitropol'skii, Yu. A. and Kurbanov, I. <i>On the solvability of boundary value problems of electromagneto-elasticity with memory</i>	329
Muravei, L. A. and Filinovskii, A. V. <i>On a parabolic boundary value problem</i>	334
Nikol'skii, S. M. <i>Approximation of functions by polynomials on a manifold</i>	339
Barski, I. L. <i>On the behavior of the spectrum of certain linear multipoint boundary value problems for ordinary differential equations</i>	342
Bobylev, N. A. and Burman, Yu. M. <i>Morse lemmas for integral functionals</i>	345
Boimatov, K. Kh. <i>Multidimensional distribution functions for degenerate elliptic operators</i>	350
Vinogradov, M. M. <i>On a general algebraic theory of linear differential operators. I</i>	355
Galaktionov, V. A. <i>On the peaking set for a nonlinear diffusion and combustion equation</i>	360
Imanaliev, M. I. and Sharipov, S. <i>The burst phenomenon in the theory of integral equations of Volterra type of the first kind</i>	366
Kosmodem'anskii, A. A., Jr. <i>A theorem on representation of the solution of the second boundary value problem</i>	371
Kochergin, V. V. <i>On the complexity of computations in finite abelian groups</i>	374
Kucherov, A. B. <i>A fast iterative method for solving in real arithmetic a system of linear equations with a complex symmetric matrix</i>	377
Labudovich [Labudović], N. and Pavichevich, Zh. [Ž. Pavičević] <i>Hyperbolic Bloch functions</i>	380
Liskovets, O. A. <i>Regularization of ill-posed mixed variational inequalities</i>	384
Mel'nik, V. S. <i>On some properties of solutions of operator equations and variational inequalities</i>	388
Pavichevich, Zh. [Žarko Pavičević] <i>Carleson measure, the Ahlfors-Shimizu characteristic, and the classes BMO and BMOA</i>	394
Pokotilo, V. G. <i>Optimization of a priori observations</i>	398

Sandrakov, G. V. <i>On a problem of H. Poincaré</i>	402
Almamedov, M. S., Bairamogly, M., and Katanova, V. I. <i>Trace formulas for a differential equation of even order with unbounded operator coefficient</i>	406
Balaev, M. K. <i>On well-posed solvability of differential-operator equations of arbitrary order</i>	411
Boimatov, K. Kh. <i>Spectral asymptotics of nonselfadjoint pseudodifferential operators in bounded domains</i>	416
Gavrilenko, Yu. V. <i>Correct classes of computations in logic programming</i>	422
Gadzhiev, A. G. <i>Control of queueing systems in a class of delays</i>	427
Zhidkov, P. E. <i>On an invariant measure for a nonlinear Schrödinger equation</i> .	431
Zhuravlev, I. V. <i>Recovery of a mapping from the normalized Jacobi matrix</i> . .	435
Zakharevich, I. S. <i>Spectral problems for the Sturm-Liouville equation with a parameter. Geometry of finite-gap potentials</i>	439
Krygin, A. V., Sukochev, F. A., and Chilin, V. I. <i>Uniform convexity and local uniform convexity of symmetric spaces of measurable operators</i>	445
Kudryavtsev, L. D. <i>On estimating a function on an infinite interval</i>	449
Lerner, M. E. <i>On the formulation and solvability of a class of boundary value problems for the Lavrent'ev-Bitsadze equation</i>	451
Pestov, V. G. <i>Nonstandard hulls of normed Grassmann algebras and their applications in superanalysis</i>	456
Pletner, Yu. D. <i>On some properties of solutions of the equation for gravitational-gyroscopic waves</i>	461
Pospelov, A. S. <i>Some estimates of the Gibbs function for partial sums of Fourier series in Λ-multiplicative systems</i>	464
Sandrakov, G. V. <i>Evolution of resonances under perturbation of a system with constant frequencies</i>	467
Serov, V. S. <i>On recovering the potential in a three-dimensional problem of scattering theory</i>	471
Tersenov, S. A. <i>On the first boundary value problem for a direct-inverse parabolic equation</i>	476
Tolstonogov, A. A. <i>Extremal selections of multivalued mappings and the "bang-bang" principle for evolution inclusions</i>	481
Almamedov, M. S. and Katanova, V. I. <i>On regularization of the trace of a higher-order differential operator with a bounded operator coefficient</i>	486
Berezhnoi, E. I. <i>Weighted inequalities of Hardy type in general ideal spaces</i> .	492
Berest, Yu. Yu. <i>Construction of fundamental solutions for Huygens' equations as invariant solutions</i>	496
Borsuk, M. V. <i>Best-possible estimates of solutions of the Dirichlet problem for linear elliptic nondivergence equations of second order in a domain with a conical point</i>	500
Varlamov, V. V. <i>Asymptotic behavior of the energy for an integro-differential equation describing acoustic waves in a relaxation medium</i>	503
Vu Kim Tuan and Nguen Tkhan' Khai [Nguyen Thanh Hai] <i>On a class of multidimensional Watson integral transforms</i>	508

Golovin, V. D. <i>Homologically trivial spaces</i>	511
Gulisashvili, A. B. <i>The mean ε-dimension of function classes with spectra contained in a given set</i>	514
Derkach, V. A. <i>On generalized resolvents of a class of Hermitian operators in a Krein space</i>	519
Dzhangibekov, G. <i>A linear junction problem for solutions of elliptic systems of differential equations with singular coefficients in the plane</i>	525
Dzhuraev, A. <i>On a boundary value problem for the Moisil-Teodorescu system of equations</i>	531
Kachurovskii, A. G. <i>A fluctuation ergodic theorem</i>	537
Kuz'minykh, A. V. <i>A continuous function whose graph intersects the graph of each polynomial in a set of cardinality of the continuum</i>	540
Mynbaev, K. T. <i>Approximate solution of a Fredholm integral equation of the second kind in a multidimensional domain</i>	543
Nazaikinskii, V. E., Sternin, B. Yu., and Shatalov, V. E. <i>On an application of the Maslov operator method to a diffraction problem</i>	547
Popa, M. N. <i>Application of invariant processes to the study of homogeneous linear partial integrals of a differential system</i>	550
Shirinbekov, M. <i>On Hartogs' theorem in classes of nonanalytic functions</i>	556
Shishkin, G. I. <i>A difference approximation of a singularly perturbed quasilinear elliptic equation degenerating into a first-order equation</i>	562
Beklaryan, L. A. <i>On a method of regularization of boundary value problems for differential equations with deviating argument</i>	567
Bronshtein, M. D. and Cherevatskii, A. S. <i>A variational method of solving boundary value problems for ordinary differential equations</i>	572
Dzhuraev, A. <i>On first-order elliptic systems with two variables that are degenerate on the boundary</i>	576
Eremin, I. I. <i>Symmetric duality for sequential linear programming problems</i>	581
Kapustin, N. Yu. and Sabitov, K. B. <i>On the solution of a problem in the theory of the Frankl' problem for equations of mixed type</i>	584
Karatsuba, A. A. <i>Zeros of linear combinations of Z-functions corresponding to Dirichlet series</i>	589
Martynyuk, A. A. <i>On boundedness of solutions of nonlinear systems with small perturbations</i>	591
Salakhitdinov, M. S. and Urinov, A. K. <i>Problems of Bitsadze-Samarskii type for an equation of mixed type</i>	595
Beklaryan, L. A. <i>An optimal control problem for systems with deviating argument, and its connection with the finitely generated group of homeomorphisms of R generated by the deviation functions</i>	600
Dzhuraev, A. <i>On the theory of elliptic systems in multiply connected domains in the plane</i>	606
Zubov, V. I. <i>The structure of the topological transformation determined by a system of differential equations</i>	610

Nguen Khong Tkhai [Nguyễn Hồng Thái] <i>The theory of semimodules of infrasemiunits in ideal spaces of vector-valued functions, and its applications to integral operators</i>	615
Stepanov, V. D. <i>On integral operators on the cone of monotone functions, and on imbeddings of Lorentz spaces</i>	620
Sternin, B. Yu. and Shatalov, V. E. <i>On a formula for the asymptotic expansion of an integral in complex analysis</i>	624
Shcherbina, N. V. <i>On the polynomial hull of a two-dimensional sphere in C^2</i> ..	628
Table of Contents for the next issue (Vol. 43, No. 3, November-December 1991, Russian original Tom 318, nos. 1-6)	632-a

Volume 43, Number 3

November-December 1991

CONTENTS

Aizenshtat, A. V., Karlovich, Yu. I., and Litvinchuk, G. S. <i>On the defect numbers of the Kveselava-Vekua operator with discontinuous derivative of the shift</i>	633
Budaev, V. D. <i>On the Bessel inequality for systems of root functions of differential operators</i>	639
Gromov, V. P. <i>Criteria for convergence of an exponential series in function spaces</i>	644
Dzhuraev, A. <i>On some mixed problems for hyperbolic systems of first order</i>	648
Zubov, V. I. <i>Interpolation of systems of differential equations</i>	653
Korobov, V. I. and Sklyar, G. M. <i>The method of generating functions for a moment problem with periodic gaps</i>	657
Magaril-Il'yaev, G. G. <i>Average dimension and widths of function classes on the line</i>	661
Nasibov, F. G. <i>Extremal problems for polynomials</i>	665
Trubin, V. A. <i>The homogeneity deficit of a network and its reduction</i>	670
Fesenko, I. B. <i>Multidimensional local class field theory</i>	674
Anikonov, Yu. E. and Stepanov, V. N. <i>An inversion formula in a problem of integral geometry</i>	678
Antonevich, A. B. and Radyno, Ya. V. <i>On a general method for constructing algebras of generalized functions</i>	680
Denisov, V. N. <i>On stabilization of the solution of the Cauchy problem for the iterated heat equation</i>	685
Zubov, V. I. <i>Synthesis of multiprogrammed stable controls</i>	689
Karatsuba, E. A. <i>On fast computation of transcendental functions</i>	693
Maksudov, F. G. and Mardanov, I. Dzh. <i>Reduction of a system of linear difference equations in a Banach space</i>	695
Osilenker, B. P. <i>The generalized shift operator with respect to orthogonal matrix polynomials</i>	698

Fedotov, A. M. <i>Numerical algorithms for analytic continuation from discrete sets, and algorithmic proof of uniqueness theorems</i>	701
Kheifits, A. I. <i>Removable sets, regular boundary points, and the Poisson-Jensen formula for generalized subharmonic functions</i>	705
Bochkarev, S. V. <i>Rearrangements of multiplicative systems</i>	708
Bryuno, A. D. <i>On finitely smooth linearization of a system of differential equations near a hyperbolic singular point</i>	711
Gavrilenco, Yu. V. <i>Majorants of logical computations. Lemmas on lifting and descending in logic programming</i>	716
Gurvich, V. A. <i>Criteria for repetition-freeness of functions in the algebra of logic</i>	721
Zubov, V. I. <i>High-frequency excitation of oscillations in the low-frequency range</i>	727
Peshkichev, Yu. A. <i>Moduli of families of two-dimensional surfaces, and quasi-conformal mappings in four-dimensional space</i>	730
Pokornyi, Yu. V. and Karelina, I. G. <i>On the Green function of the Dirichlet problem on a graph</i>	732
Shelukhin, V. V. <i>On the solution of linear evolution equations by a variational method</i>	735
Antontsev, S. N. and Shmarëv, S. I. <i>The local energy method and vanishing of weak solutions of nonlinear parabolic equations</i>	738
Buyarov, V. S. <i>Logarithmic asymptotics of polynomials orthogonal on the real axis</i>	743
Vorob'ev, O. Yu. <i>Set-summation</i>	747
Gavrilenco, Yu. V. <i>The structure of principal logical computations and the decomposition of idempotents</i>	752
Gel'fand, I. M., Graev, M. I., and Retakh, V. S. <i>Reduction formulas for hypergeometric functions on the Grassmannian $G_{k,n}$, and a description of hypergeometric functions on strata of small codimensions</i>	757
Ershov, Yu. L. <i>Projective Γ-groups</i>	762
Zubov, V. I. <i>Integrators of differential equations</i>	767
Makarov, V. L. and Khlobystov, V. V. <i>On the general structure of polynomial functional interpolants</i>	771
Martynyuk, A. A. <i>A theorem on multistability</i>	775
Napalkov, V. V. and Bashmakov, R. A. <i>Concerning sufficient sets on algebraic Riemann surfaces</i>	779
Pokhozhaev, S. I. <i>On integral solutions of quasilinear elliptic equations</i>	783
Roitberg, Ya. A. <i>Boundary value and mixed problems for general hyperbolic systems in a complete scale of Sobolev-type spaces</i>	788
Sadovnichii, V. A. and Dubrovskii, V. V. <i>A formula for the first regularized trace of the Laplace-Beltrami operator with a potential</i>	794
Sviridyuk, G. A. <i>Semilinear equations of Sobolev type with relatively bounded operator</i>	797
Strugov, Yu. F. <i>On the homeomorphic nature of some classes of spatial p-harmonic mappings</i>	802

Umarov, S. R. <i>On well-posedness of systems of pseudodifferential equations with variable analytic symbols</i>	806
Bil'man, B. M. and Dzhangibekov, G. <i>On some systems of two-dimensional singular integral equations</i>	811
Bogovskii, M. E., Maslennikova, V. N., and Uerdian, Zh. A. [J. A. Werdian] <i>On a boundary value problem with discontinuous boundary conditions in ocean dynamics under the influence of a hurricane</i>	816
Vasin, V. V. <i>Iterative approximation of solutions in the finite moment problem</i>	821
Goryainov, V. V. <i>Semigroups of analytic functions, and branching processes</i>	826
Gokhman, A. O. <i>Representation of differentiable symmetric functions in different bases</i>	830
Dzhuraev, A. <i>Holomorphic vectors in C^2, and kernel matrices</i>	834
Ezhov, I. I. and Kadankov, V. F. <i>On duality formulas for an integral random walk</i>	839
Zubov, V. I. <i>Stationary oscillations and waves</i>	844
Kipriyanova, N. I. <i>On uniform convergence of expansions in eigenfunctions of a B-harmonic operator in a closed domain</i>	847
Kurbanov, I. <i>On the solvability of nonlinear boundary value problems of electrodynamics with memory</i>	851
Lezhenina, I. F. and Sobolevskii, P. E. <i>An estimate of solutions of a parabolic equation with a singular estimate of the coefficient</i>	855
Logofet, D. O. <i>Nonlinear Leslie model revisited: the asymptotics of trajectories in the primitive and imprimitive cases</i>	861
Maiorescu, V. E. <i>Integral and Kolmogorov widths of classes of differentiable functions</i>	866
Mardanov, I. Dzh. <i>Reduction of a system of nonlinear difference equations in a Banach space</i>	871
Novitskii, I. M. <i>Reduction of linear operators in L_2 to integral form with smooth kernels</i>	874
Skriganov, M. M. <i>The geometry of numbers and uniform distributions</i>	878
Khasanov, A. B. <i>The inverse scattering problem for a perturbed finite-gap Sturm-Liouville operator</i>	882
Khe Kan Cher <i>An estimate of solutions of Darboux-Protter problems for the two-dimensional wave equation</i>	887
Tsekanovskii, V. È. and Tsekanovskii, È. R. <i>Stieltjes operator-valued functions with gaps and their realization by conservative systems</i>	892
Gol'berg, A. I. and Gurvich, V. A. <i>Some properties of tight cyclic game forms</i>	898
Guts, A. K. <i>A topos-theoretic approach to the foundations of relativity theory</i> ..	904
Didenko, V. D. <i>On a method of approximate solution of singular integral equations with conjugation on piecewise smooth contours</i>	908
Zubov, V. I. <i>Vortex surfaces</i>	912
Il'in, V. P. <i>On incomplete factorization methods for solving parabolic equations</i>	915
Kapustin, V. V. <i>A criterion for reflexivity of contractions with defect operator of Hilbert-Schmidt class</i>	919

Kusraev, A. G. <i>On the structure of vector measures and complete Boolean algebras</i>	923
Levenshtam, V. B. <i>Exponential dichotomy and the averaging method for parabolic equations with a rapidly oscillating principal part</i>	928
Pokhozhaev, S. I. <i>On entire solutions of a class of quasilinear elliptic equations</i>	932
Table of Contents for the next issue (Vol. 44, No. 1, January-February 1992, Russian original Tom 319, nos. 1-6)	936-a
